SUMMARY

- An Enthusiastic Computer Science student in AI and ML with a passion for technology and problem solving. Passionate about AI and ML, with a keen interest in sustainable AI solutions I specialize in designing data-driven solutions for predictive models and intelligent systems to solve real-world problems. I'm also good in software development algorithms and data structures. Passionate about creating innovative solutions leveraging AI/ML to drive innovation efficiency and improve user experiences. And always open to learn a new skill if needed and if it can get my job done. Let's connect to explore innovations and opportunities in the tech world!
