AI / MACHINE LEARNING ENGINEER

AI/ML engineer with hands-on experience building and deploying computer vision, NLP, and predictive modeling systems using Python, TensorFlow, and PyTorch. Skilled in data preprocessing, model training/evaluation, and shipping ML-powered applications end-to-end with Streamlit and REST APIs. Strong foundation in data structures, algorithms, and applied statistics.

SKILLS

Languages: Python, C++, SQL, HTML/CSS

ML/DL Frameworks: TensorFlow, PyTorch, Scikit-learn, Keras, OpenCV

AI Specializations: Machine Learning, Deep Learning, Computer Vision, NLP, LLMs, Retrieval-Augmented Generation (RAG)

Libraries & Tools: NumPy, Pandas, Matplotlib, LangChain, HuggingFace Transformers, FAISS, Streamlit

Data & Infra: Data Preprocessing, Feature Engineering, Model Evaluation, Git/GitHub, Docker, Linux, Jupyter

Other: Agile/Scrum, OCR, GIS/Remote Sensing (Google Earth Engine, ArcGIS)

EXPERIENCE

Graduate Engineer Trainee (GET), LTM

Jun 2025 – Jul 2026, Navi Mumbai

- Received training in Java programming, Object-Oriented Programming (OOP), SQL, data structures, and software engineering concepts.
- Gained exposure to enterprise development practices, collaborative learning environments, and professional workplace standards.

Artificial Intelligence Intern, Infosys Springboard

Dec 2025 – Mar 2026, Remote

- Built an end-to-end AI Diet Planner that uses OCR to extract structured medical data from prescription images and an ML model to predict health conditions from extracted values
- Engineered the OCR-to-ML data pipeline, cleaning noisy extracted text and mapping it to structured model inputs to improve prediction reliability

Data Analyst Intern, Saint Louis University

Jul 2025 – Aug 2025, Remote

- Cleaned and analyzed complex, multi-source datasets in Python (Pandas, NumPy) to surface trends supporting data-driven decisions
- Built audience-focused visual dashboards (Matplotlib) following data visualization best practices for non-technical stakeholders

PROJECTS

RAG Chatbot — LangChain, HuggingFace, FAISS – [GitHub](#)

- Built a Retrieval-Augmented Generation chatbot combining a HuggingFace LLM with a FAISS vector store for context-aware, low-hallucination responses
- Designed the retrieval and prompt-augmentation pipeline to improve answer relevance over a raw-LLM baseline

AI Diet Planner — Machine Learning | Computer Vision | Streamlit – [GitHub](#)

- Developed an AI-powered healthcare application using Python, TensorFlow/Keras, EasyOCR, and Streamlit to provide personalized diet recommendations based on nutritional analysis and user health
- Integrated OCR, image preprocessing, and machine learning techniques to automate nutrition information

AI Weather Forecasting System — Regression Models – [GitHub](#)

- Built a regression-based ML pipeline to forecast weather for Bengaluru, achieving $\pm 2^{\circ}\text{C}$ prediction accuracy through feature engineering and model tuning
- Automated data ingestion and preprocessing to keep the model pipeline reproducible end-to-end

EDUCATION

Bachelor of Technology, Computer Science (AI & ML)

2022 – 2026

Vellore Institute of Technology, Bhopal, Madhya Pradesh • CGPA: 7.87

LEADERSHIP & EXTRACURRICULAR

Lead Volunteer, Industrial Conclave 2024, VIT Bhopal

Aug 2024

- Coordinated cross-functional teams and event logistics for a university-wide technical conclave

Student Coordinator, Experiential Learning Program 2024, VIT Bhopal

Sep 2024

- Managed event planning, technical coordination, and communication between students and faculty.

CERTIFICATIONS

- Machine Learning with Python — IBM (Coursera), Jan 2024
- Artificial Intelligence Primer — Infosys, Jun 2025
- Google Project Management Professional Certificate — Google (Coursera), Sep 2025
